
Light Jet

Learjet 35A

RANGE: 2,056 nm
SPEED: 500 mph
PASSENGERS: 8
CABIN DIM.: L: 12.9' W: 4.9' H: 4.9'
HOME BASE: San Diego, CA

The strength of the Learjet 35A is its range, takeoff, and cruise capabilities. It has a relatively long range for a private jet and can cruise at a speed of 500mph. Pilots have commented on its agility and excellent performance capabilities.

The Learjet 35A has received several prestigious honors since it was first produced. It was selected for use as a military jet and was the first private jet to land at Denver International Airport when their new runway opened. It also seems to be a favorite among celebrities.
