The Premier 1A provides innovative technology from its exterior to the interior. Its drag reducing aerodynamics along with the swept wing design increases cruising speed and high level altitudes. The state of the art avionics enhance flight safety at its maximum and a cabin cross section, wider than any typical light jet, offers unparalleled luxury during the flight. Amenities which range from retractable tables with power for laptops to a private lavatory punctuate comfort.

Its cabin offers a standard seating for six passengers.

A top of the range Aircraft supported by experienced pilots, qualified ground personnel and state of the art maintenance facilities offer an unforgettable way of travel.
