

AMBER JET

We understand how valuable your time is. Amber Jet Group offers you
fast and confidential flight services

www.amberjet.net

COMFORT

Our unchanging aim is to surpass your wildest expectations. We check all the details and provide personal comfort for each passenger, offering an extensive range of private jets, ground support services, VIP transport and on-board catering from the best restaurants in the world.

SAFETY

We work with reliable partners only – airline operators who meet the requirements of EASA, FAA and have a valid air operator certificate. All our flights are carried out by highly professional crews who undergo all necessary flight training at the leading training centers in Europe and the USA.

PASSENGER CHARTER

The team of qualified professionals Amber Jet actively works in the market of individual group air flights, organizing round-the-world flights of any complexity for sports federations, tour operators, music bands, as well as large companies and state institutions.

CARGO CHARTER

Our company has extensive experience in the field of cargo charters and organization of flights to the most remote and inaccessible places of the planet. We guarantee that our team will quickly process your request, offering the most convenient and cost-effective option in the market.

EMPTY LEGS

Flying privately does come at a cost. Typical charter prices range from approximately 2,000 EUR per flight hour on the low end for a turboprop to 8,000 EUR per flight hour for a heavy jet.

There is one option to consider that can save you a substantial amount of money – taking an empty leg charter.

Empty leg charter space becomes available when an existing customer charts a flight one-way. That plane still has to return to its home airport, and that means costs for the carrier – everything from housing the flight crew to the fuel and other costs to fly the aircraft home.

Booking your flight on one of these empty legs means that you are actually helping reduce the carrier's costs – a favor the carrier returns by charging up to 70% less than you would pay by booking a regular charter flight. Industry estimates show that around 60 % of all private aircraft are flying empty, so there is a lot of capacity to fill these seats.

On the other hand, flying on empty legs means you need to be more flexible and creative than when chartering your own flight. If your schedule and lifestyle can afford this – empty leg charters may be perfect for your needs.

AMBER JET GROUP — IS A COMPANY CREATED BY PILOT
