Falcon F7X [HB-JST] **Elegance with a low emission footprint**

The 3-engine Falcon 7X is the first business jet equipped with cutting-edge fly-by-wire technology. This ultra-long-range aircraft has excellent fuel efficiency and thus a low carbon emissions footprint.

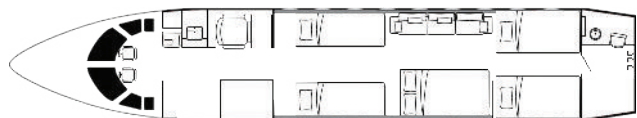

It is perfectly suited for landing or taking-off on shorter airstrips as well as getting a traveller into London City airport or Lugano, both steep approach airports.

A spacious cabin serving as your office in the sky comes with wireless for internet access, emails or messaging on your portable device as well as a satellite phone. Alternatively, 6 passengers can sleep comfortably to arrive rested and fresh at their destination.

Technical Data

Range: max 11'019km (5950NM) or approx. 12 flight hours
