AIRCRAFT DESCRIPTION:

The highly successful Citation Jet was developed as a replacement for the Citation 500 and Citation I. Cessna launched the new Model 525 Citation Jet at the annual U.S. National Business Aircraft Association convention in 1989. First flight occurred on April 29, 1991, FAA certification was awarded on October 16, 1992 and the first delivery was on March 30, 1993. The Citation Jet is effectively being an all-new aircraft. The same basic Citation forward fuselage is mounted to a new T-tail and a new supercritical laminar flow wing, and it features Williams Rolls FJ44 turboprops (with paddle thrust reversers) and trailing link main landing gear. The Citation Jet's fuselage is (11 in) shorter than the Citation 500/Citation I's, while cabin height is increased courtesy of a lowered center aisle. It features Two-tube EFIS avionics and is certificated for single pilot operation.
