SPEED: 475 mph  
PASSENGERS: 7  
CABIN DIM.: L: 11' W: 4.9' H: 4.8'  
HOME BASE: Austin, TX

---

Pilot workload is reduced now that FADEC is standard. Maximum takeoff load has been increased. So has payload. The CJ2+ also climbs more quickly, cruises faster and ranges farther than its predecessor. Yet, remarkably, it uses less fuel. The CJ2+ also delivers enhanced passenger and pilot comfort and more advanced avionics, it can also take off and land on shorter runways, even in high-hot conditions. Yes, it's exhilarating to fly, but the CJ2+ is also the sensible business jet for you and your business.
