

GLOBAL 6000

6000 NM
11 200 km

The ultra long-range business jet

This time-saver can fly thirteen hours non-stop at high speed, taking up to twelve passengers anywhere in the world in an exclusive, luxurious and comfortable environment, fully equipped for business (integrated communication systems), entertainment (Blu-ray/DVD player) and relaxation. Thanks to its short field performance, this Global can use restrictive airports with just 1500 m long runways and thus brings passengers closest to their final destination and consistently reduce their travel time.

The aft section, separated from the cabin by a sliding door, can be converted into a comfortable suite of one double bed and one single bed, with direct access to a private restroom and closet as well as to the baggage compartment. The mid section offers two single and one double bed accommodation.

Fine dining is served on board by our flight attendant.
