

ARCOSJET

WE AIM
HIGHER

Every boy has a dream growing up. Some get to fulfill it later in life. I had a dream, too, and a passion for flying. I wanted to be able to share this amazing experience with you.

Undoubtedly, flying is the safest, the fastest, the most comfortable way to travel, whether on business or on holidays with your loved ones. The biggest saving is time. After you've had it all, there is one more thing left: the most expensive toy. The ultimate business tool. A private jet.

Since our first aircraft sale, we have come a long way, from selling a few jets a year to becoming one of the key players on the market, and gaining recognition both in our domestic region and abroad. Our clients' success and loyalty has helped us become the company we are today.

At ArcosJet "We Aim Higher" to satisfy your needs and share our passion for aviation with you. We keep evolving because we want to be the best in what we do.

We welcome you to join our world of high living and aviation.

A handwritten signature in black ink, appearing to read "Mikhail Alenkin".

About ArcosJet

With experience in aircraft sales and acquisitions, fleet management, FBO and heliport construction, interior design, and helicopter operations, the ArcosJet team brings confidence, know-how, innovation, and efficiency to business aviation.

We established the company in 2014, having previously succeeded in various projects and sharing between us many decades of industry experience and passion for aviation. With headquarters in Dubai and having offices in Moscow, Vienna and London, we have a truly global outreach – much like the winged machines that we buy, sell, operate, and fly.

What we do

Although our core activity is aircraft sales and acquisitions, we strive to explore new areas of the market and are always ready to offer our customers the services they require, be it aircraft management, maintenance supervision, crew training, legal support, or a multitude of other things one would never think about until they got an aircraft to look after. Even in the process of an aircraft acquisition or sale, there are so many considerations: financing, leasing, insurance, pre-purchase inspections, technical acceptance, taxes, deregistration and exportation and so on.

We've spent many years studying and perfecting our processes so all our customers need to do is outline the task and go about their business while we produce the results.

Our achievements

Clients from Russia,
CIS, Europe, USA, Middle East

Offices in Dubai, Moscow,
Vienna and London

Pre-owned aircraft sales
worth over \$2 billion

Creating a fleet management
company for a customer with
7 business aircraft

Delivery of 35 new aircraft,
including a fleet of 15 large
helicopters, to customers in
Russia and CIS

Involvement in concept interior
designs for the business versions
of the Sukhoi Superjet, as well as
a number of completed Airbus
ACJ and Boeing BBJ aircraft

Establishing a European aircraft
operator certified under EASA,
as well as a CAMO organisation
to support its activities

Your benefits

With ArcosJet you benefit from the following unique advantages:

- A team of professionals with a strong experience in aircraft sales transactions
- Profound knowledge of business aircraft and their advantages for specific objectives
- Impressive connections across the industry, worldwide impeccable reputation
- Impressive expertise and business network in emerging markets, such as BRICS, MINT, unique metrics and analytics
- In-house technical team to assist in any inspections and technical maintenance
- In-house legal team to guarantee protection in aviation deals for clients
- Strong ties with financial institutions, insurance and leasing companies

Autorized sales and service center of Pilatus Aircraft in Russia

*The Most Wanted Single
Exceeding Expectations Everywhere*

Nesterov Aviation, a member of ArcosJet group of companies, represents the Pilatus PC-12 NG on the Russian market. The Pilatus PC-12 NG has gained a reputation for outstanding versatility, performance, reliability and operational flexibility. As such, it is one of the most popular turbine-powered business aircraft on the market today. Over 1400 aircraft have been sold.

The App

Ivan Veretennikov, Business Development Director at ArcosJet, had previously developed a unique JetBook App for professionals and business aviation aficionados. We have adapted this app to serve as a sales and presentation tool for ArcosJet. The app contains one of the most detailed and comprehensive collections of business jet model information on the market, including full size schematics, images, 360° tours, etc. The number of features the App contains is unprecedented.

According to customer testimonials, the app has proven to be an easy-to-use source of accurate data, a great presentation tool to show different aircraft to customers, and an elegant mobile alternative to paper brochures and online tools.

The App allows ArcosJet to stand out from the other brokers and to present your aircraft in a unique, immersive way. This greatly increases the chances of a faster and more successful deal. We are constantly working on new features, such as virtual reality, cabin configurators, and others that empower our customers and give them greater insight in the world of business aviation.
