# Global 6000

The Bombardier Global 6000, an ultra-long range category aircraft, features three cabin zones and advanced wing technology, offering unmatched wing flexibility in its class. This innovation enhances turbulence handling, ensuring an exceptionally smooth ride. With top-class performance in speed and range, the Global 6000 can carry 15 passengers for up to 6,000-nautical miles, and seamlessly blends luxury and functionality for non-stop long-distance travel.
